

A complex graph diagram with blue and green edges and red and purple nodes. The graph is composed of several interconnected components. On the left, there are two clusters of red nodes. In the center, there are two vertical chains of red nodes connected by green edges. On the right, there is a large, complex structure with many red nodes and several purple nodes. The edges are primarily blue, with some green edges connecting the central vertical chains. The overall structure is highly interconnected, with many loops and paths.
